## SESSION 1: PLENARY SESSION

Plenary Address: Slags and fluxes entering the new millennium: an analysis of recent trends in research and development <b>R. Boom, S. Riaz, and K.C. Mills</b> .....	1
Plenary Address: Electrochemical processing using slags, fluxes and salts <b>D. Fray</b> .....	7

## SESSION 2A: THERMODYNAMICS AND EQUILIBRIUM

Keynote Address: The recent trends in research on slags in China <b>J. Zhang</b> .....	13
Thermodynamics of the MnO-containing slags and equilibrium relations associated with Mn ferroalloy productions <b>K. Tang and S.E. Olsen</b> .....	19
The thermodynamic activity of MnO in stainless steel type slags <b>K. Ding and R.H. Eric</b> .....	25

## SESSION 2B: VISCOSITY

Keynote Address: Viscosities of slags-an overview <b>S. Seetharaman, K. Mukai, and Du Sichen</b> .....	31
Viscosity and flow behaviour of TiO <sub>2</sub> -containing blast furnace slags under reducing conditions <b>D. Xie, Y. Mao, and Y. Zhu</b> .....	43
Modelling viscosity of TiO <sub>x</sub> containing silicate melts <b>L. Zhang and S. Jahanshahi</b> .....	51

## SESSION 2C: INDUSTRIAL APPLICATIONS

Keynote Address: Industrial uses of slag—The use and re-use of iron and steelmaking slags <b>R. Dippenaar</b> .....	57
On the role of slag in the oxygen converter process <b>H. Jalkanen and L. Holappa</b> .....	71
A study of metal droplet distributions in slags during ladle treatment phase of secondary steelmaking <b>J. Ekengård, H. Srinath, M. Andersson, D.S. Sarma, and P. Jönsson</b> .....	77

## SESSION 3A: THERMODYNAMICS AND EQUILIBRIUM

Keynote Address: Phase equilibria determination in complex slag systems <b>E. Jak and P.C. Hayes</b> .....	85
Effect of MgO and Al <sub>2</sub> O <sub>3</sub> variations in oxygen steelmaking (BOF) slag on slag morphology and phosphorus distribution <b>B. Deo, J. Halder, B. Snoeijer, A. Overbosch, and R. Boom</b> .....	105
Activity of chromium oxide in CaO-SiO <sub>2</sub> based slags at 1873 K <b>K. Morita and N. Sano</b> .....	113
Chromium distribution between slag and non-carbon saturated metal phases under changing partial pressure of carbon monoxide <b>X. Pan and R.H. Eric</b> .....	119
Oxidation state of titanium in CaO-SiO <sub>2</sub> -TiO <sub>x</sub> slags at 1873K <b>C. Ariyo, P. Gonzalez, and L. Holappa</b> .....	125

## SESSION 3B: VISCOSITY

Viscosity of SiO <sub>2</sub> -CaO-CrO <sub>x</sub> slags in contact with metallic chromium and application of the Iida model <b>L. Forsbacka and L. Holappa</b> .....	129
Calculation models on the viscosity of the CaO-SiO <sub>2</sub> -TiO <sub>2</sub> slag system <b>J.-Y. Jia, C.-G. Bai, G.-B. Qiu, D.-F. Chen, and Y. Xu</b> .....	137
Quasi-chemical viscosity model for fully liquid slags in the Al <sub>2</sub> O <sub>3</sub> -CaO-‘FeO’-SiO <sub>2</sub> system <b>A. Kondratiev and E. Jak</b> .....	141
Viscosity of CaO-Cu <sub>2</sub> O-MgO-SiO <sub>2</sub> slags <b>S. Wright</b> .....	151
The viscosities and structures of calcium silicate slags containing MgO, CaF <sub>2</sub> , and Al <sub>2</sub> O <sub>3</sub> <b>J.H. Park, D.S. Kim, Y.D. Lee, H.S. Song, and D.J. Min</b> .....	157

### SESSION 3C: INDUSTRIAL APPLICATIONS

Keynote Address: Melting of platinum group metal concentrates in South Africa <b>J. Nell</b> .....	165
Factors affecting nickel recovery from slags produced during platinum smelting <b>L. Andrews</b> .....	171
Copper losses to slags obtained from the E1 Teniente process <b>I. Imiris, M. Sanchez, and G. Achurra</b> .....	177
Feasibility of recovering metals from associated slags <b>Z. Sui, L. Zhang, L. Zhang, M. Wang, T. Lou, and H. Chen</b> .....	183

### SESSION 4A: THERMODYNAMICS AND EQUILIBRIUM

Physico-chemical properties and transition metal complex formation in alkali pyrosulphate and hydrogen sulphate melts <b>S.B. Rasmussen, H. Hama, K.M. Eriksen, G. Hatem, M. Gaune-Escard, and R. Fehrmann</b> .....	189
CaF <sub>2</sub> solubility in NaCl-KCl salt flux for aluminium recycling <b>A. Sydykov, B. Friedrich, E. Milke, and A. Arnold</b> .....	197
Heat capacity measurement of molten NaNO <sub>3</sub> -NaNO <sub>2</sub> -KNO <sub>3</sub> by drop calorimetry <b>M. Kawakami, K. Suzuki, S. Yokoyama, and T. Takenaka</b> .....	201
Phase equilibria in the Fe-Zn-O system at conditions relevant to zinc sintering and smelting <b>R. Hansson, P.C. Hayes, and E. Jak</b> .....	209

### SESSION 4B: VISCOSITY

Gliding cylinder method for the viscosity measurement of molten salts, slags and glasses <b>Y. Shiraishi and Y. Sakurai</b> .....	215
Liquidus temperature and viscosity of melter slags <b>M. Somerville, S. Wright, S. Sun, and S. Jahanshahi</b> .....	219
Viscous behaviour of CaO-SiO <sub>2</sub> -Al <sub>2</sub> O <sub>3</sub> -MgO-FeO slag <b>Y.S. Lee, J.R. Kim, S.H. Yi, and D.J. Min</b> .....	225
The influence of Fe <sup>3+</sup> /Fe <sup>2+</sup> ratio on the viscosity of silicate slags <b>S. Wright and L. Zhang</b> .....	231

### SESSION 4C: INDUSTRIAL APPLICATIONS

Keynote Address: Equilibrium interactions between freeze lining and slag in ilmenite smelting <b>P. C. Pistorius</b> .....	237
Experimental investigation of liquids temperatures of ISP slags <b>B. Zhao, E. Jak, and P.C. Hayes</b> .....	243
Sulphur bonding in solidified ladle slags <b>W. Posch, H. Preßlinger, M. Mayr, K. Klepp, and H. Hiebler</b> .....	249
The effect of molten sodium titanate and carbonate salt mixture on the alkali roasting of ilmenite and rutile minerals <b>V. Tathavadkar and A. Jha</b> .....	255

### SESSION 5: PLENARY ADDRESS

Unique functions of slags in steelmaking <b>R.J. Fruehan</b> .....	263
---	-----

### SESSION 6A: THERMODYNAMICS AND EQUILIBRIUM

Surface tension of Cu-O alloys at 1400 K <b>C. Nexhip, R. Davidson, and S. Sun</b> .....	271
Activities of Cu, Fe and Ni in Cu-Fe-Ni-S mattes <b>S. Wright, S. Jahanshahi, and S. Sun</b> .....	277
Thermodynamic studies of FeO-containing slags and their impact on the ladle refining process <b>P. Fredriksson and S. Seetharaman</b> .....	285
TEM study of solid titanium oxides inclusions in steel melt at 1600°C <b>C.-T. Mutale, A.S. Tuling, and S.M.C. Verryn</b> .....	293
The effect of carbon in slag on steel reoxidation by CaO-SiO <sub>2</sub> -Al <sub>2</sub> O <sub>3</sub> -MnO-FeO slags <b>M.-O. Suk, S.-K. Jo, C.-W. Seo, S.-H. Kim, J.-S. Kim, S.-C. Shim, and J.T. Kim</b> .....	299

### SESSION 6B: REFRACTORIES

Keynote Address: Direct and indirect slag corrosion of oxide and oxide-c refractories <b>W.E. Lee and S. Zhang</b> .....	309
Impact of slag refractory lining reactions on the formation of inclusions in steel <b>K. Beskow, N. N. Tripathi, M. Nzotta, A. Sandberg, and Du Sichen</b> .....	321
Laboratory study of the interaction mechanisms between magnesia-chromite refractories and Al <sub>2</sub> O <sub>3</sub> -rich VOD slags <b>M. Guo, S. Parada, S. Smets, P.T. Jones, J. Van Dyck, B. Blanpain, and P. Wollants</b> .....	327
Interactions of two-liquid CaO-MgO-FeO-P <sub>2</sub> O <sub>5</sub> slag with MgO refractories <b>T. Tamura and M. Hino</b> .....	337
Corrosion mechanism and kinetic behaviour of refractory materials in contact with CaO-Al <sub>2</sub> O <sub>3</sub> -MgO-SiO <sub>2</sub> slags <b>S. Jansson, V. Brabie, and L. Bohlin</b> .....	341

## SESSION 6C: ENVIRONMENTAL

Keynote Address: Recycling and environmental issues of metallurgical slags and salt fluxes <b>M. Reuter, Y. Xiao, and U. Boin</b> .....	349
Environmental aspects of utilization of steel industrial slags <b>R. Hiltunen and A. Hiltunen</b> .....	357
Economic and environmentally beneficial treatment of slags in DC arc furnaces <b>R.T. Jones</b> .....	363
Treatment of lead and zinc slags in hollow electrode DC-EAF in consideration of calculated phase equilibria and thermodynamics <b>E. Hecker, B. Friedrich and J. Böhlke</b> .....	377
Steel-slag as filler material in concrete <b>H. Moosberg-Bustnes</b> .....	385

## SESSION 7A: KINETICS

Keynote Address: A comparison of the kinetics of the CO-CO <sub>2</sub> reaction with steelmaking and copper-making slags <b>M. Barati, E. Chen, and K. Coley</b> .....	393
A Kinetic study of carbon injection into electric arc furnace slags <b>F.-Z. Ji, M. Barati, K. Coley, and G.A. Irons</b> .....	399
Multi-component diffusion of metal ions in lime-alumina-silica slags <b>M.D. Dolan and R.F. Johnston</b> .....	407
Mass exchange at the metal-slag interface in the continuous casting process <b>P.R. Scheller</b> .....	411

## SESSION 7B: REFRACTORIES

Slag formation during high-temperature interactions between SiO <sub>2</sub> -containing refractories and iron melts with oxygen <b>E. Kapilashrami, V. Sahajwalla, and S. Seetharaman</b> .....	417
Slag/refractory and metal/refractory interactions during the production of stainless steels <b>N. Sutcliffe</b> .....	423
Effects of slag chemistry and temperature on wetting and penetration of refractories by slags <b>T. Tran, D. Xie, and Y.B. Cheng</b> .....	437
Thermodynamic investigations of corrosion phenomena caused by metal halide salt melts in high temperature discharge lamps <b>T. Markus and K. Hilpert</b> .....	443

## SESSION 7C: INDUSTRIAL APPLICATIONS

Keynote Address: Development of a CaO-CaF <sub>2</sub> -slag system for high rare earth contents <b>T. Müller and B. Friedrich</b> .....	449
MgO modification of slag from stainless steelmaking <b>J. Eriksson and B. Bjorkman</b> .....	455
Electrochemical vaporization of SiO from Na <sub>2</sub> O-SiO <sub>2</sub> slag by transferred argon plasma <b>K. Nagata and Y. Nakata</b> .....	461
A fluid dynamics simulation of chromium recovery from AOD slags during reduction with ferrosilicon additions <b>R.I.L. Guthrie, M. Isac, and Z.H. Lin</b> .....	465

## SESSION 8A: TRANSPORT/INTERFACIAL PHENOMENA AND FOAMING

Keynote Address: Foaminess of slag: cause and control <b>A.K. Lahiri and S. Pal</b> .....	473
Foaming of model slags containing V <sub>2</sub> O <sub>5</sub> under dynamic conditions <b>A. Kapilashrami, M. Görnerup, A.K. Lahiri, and S. Seetharaman</b> .....	479
Research on the foaming property of blast furnace slag bearing TiO <sub>2</sub> <b>B. Chenguang, Q. Guibao, and P. Henian</b> .....	483
The oxidation state dependence of the electrical conductivity of high iron containing slags <b>R.J. Hundermark, S. Jahanshahi, and S. Sun</b> .....	487

## SESSION 8B: MODELLING AND SIMULATION

Keynote Address: Modelling physico-chemical properties of melts and kinetics of coal-slag reactions <b>S. Jahanshahi, L. Zhang, S. Sun, D. Langberg, D. Xie, and C. Chen</b> .....	493
Computer modelling of molten halides using diffraction data <b>D.K. Belashchenko and O.I. Ostrovski</b> .....	503
Review and thermodynamic modelling of CoO in iron silicate-based slags and calcium ferrite-based slags <b>C. Chen, L. Zhang and, S. Jahanshahi</b> .....	509
A Thermodynamic approach to physical properties of silicate melts <b>R. E. Aune, M. Hayashi, and S. Sridhar</b> .....	517

## SESSION 8C: INDUSTRIAL APPLICATIONS

Keynote Address: Slag properties and design issues pertinent to matte smelting electric furnaces <b>R. H. Eric</b> .....	531
Management of copper pyrometallurgical slags: giving additional value to the copper mining industry <b>M. Sánchez, F. Parada, R. Parra, F. Marquez, R. Jara, J.C. Carrasco, and J. Palacios</b> .....	543
Magnetite behaviour in Peirce Smith converters slag at Ilo copper smelter plant, Peru <b>C. Morales, J. Palacios, and M. Sánchez</b> .....	551
Modelling of antimonate capacity in copper and nickel smelting slags <b>J.M. Font and R.G. Reddy</b> .....	557

## SESSION 9: PLENARY SESSION

Fire and the art of metals—A short history of pyrometallurgy <b>F. Habashi</b> .....	563
---	-----

## SESSION 10A: TRANSPORT/INTERFACIAL PHENOMENA

Observations of behaviour of oxide inclusions at molten slag/steel interfaces <b>G. N. Shannon, Y Wang, S. Vantilt, B. Coletti, B. Blanpain, and S. Sridhar</b> .....	571
Experimental model study for separation and dissolution of liquid inclusions at the interface between steel and slag <b>M. Magnelöv, U. Sjöström, and Du Sichen</b> .....	577
The dissolution behaviour of selected oxides in CaO-SiO <sub>2</sub> -Al <sub>2</sub> O <sub>3</sub> slags <b>B.J. Monaghan, S.A. Nightingale, L. Chen, and G.A. Brooks</b> .....	585
A study of dissolution of dense lime in molten slags under static conditions <b>S. Haji Amini, O. Ostrovski, and M.P. Brungs</b> .....	595
Rate of reoxidation of ultra-low carbon steel in contact with slag of various compositions <b>K.Y. Lee, J.M. Park, and C.W. Park</b> .....	601

## SESSION 10B: MODELLING AND SIMULATION

Keynote Address: Thermodynamic models and databases for slags, fluxes and salts <b>A.D. Pelton</b> .....	607
Structural dependence of alkali oxide activity in coal ash slags <b>M. Mueller, W. Willenborg, K. Hilpert, and L. Singheiser</b> .....	615
Modelling and prediction of reactions involving metals, slags and fluxes <b>H. Gaye and J. Lehmann</b> .....	619
Modelling of Al, Si, Mn and Ti partition between slag and Fe-Ni alloys <b>J. Lehmann, H. Gaye, and S. Witzke</b> .....	625
Prediction of SiO <sub>2</sub> -Al <sub>2</sub> O <sub>3</sub> -CrO <sub>x</sub> complex inclusions in steel containing 16 per cent Cr-Si-Al-Mn <b>J.-H. Choi, S.-B. Lee, H.-G. Lee, P. C.-H. Rhee, D. S. Kim</b> .....	631

## SESSION 10C: INDUSTRIAL APPLICATIONS

Keynote Address: Slags in ferroalloys production—review of present knowledge <b>L. Holappa and Y. Xiao</b> .....	641
An investigation into aspects of liquid phase reduction of manganese and silica containing slag <b>S. Gaal, K. Berg, G. Tranell, S.E. Olsen, and M. Tangstad</b> .....	651
Removing impurities from high carbon ferrochromium by treatment with slag mixtures <b>K.L. Kossyrev, A.V. Pavlov, and A.V. Dubachev</b> .....	659
Reduction of chromium oxide containing slags using CaC <sub>2</sub> injection <b>J. Björkvall, S. Ångström, and L. Kallin</b> .....	663
Physical modelling of slag-metal dispersion <b>G. Akdogan and R.H. Eric</b> .....	671

## SESSION 11A: SENSORS AND MEASUREMENT

Keynote Address: Alternative methods for <i>in situ</i> determination of iron oxide in steelmaking slags <b>K. Schwerdtfeger</b> .....	679
<i>In situ</i> measurement of the oxygen activity of low carbon steel ladle slags <b>S. Smets, J. Janssens, B. Coletti, J. Plessers, B. Blanpain, and P. Wollants</b> .....	687
Spectroscopic analysis of slags—preliminary observations <b>T. Sowmya and S.R. Sankaranarayanan</b> .....	693
Solid-state <sup>19</sup> F NMR on CaO-SiO <sub>2</sub> -CaF <sub>2</sub> glasses <b>T. Watanabe, M. Hayashi, S. Hayashi, H. Fukuyama, and K. Nagata</b> .....	699
Preliminary microwave measurements on liquid slags <b>U. Malmberg, J. Björkvall, J. Malm, and L. Bååth</b> .....	707

## SESSION 11B: MOULD FLUXES

Keynote Address: The performance and properties of mould fluxes <b>K.C. Mills, A.B. Fox, R.P. Thackray, and Z. Li</b> .....	713
Continuous casting mould powder and casting process interaction: why powders do not always work as expected <b>V. Ludlow, B. Harris, S. Riaz, and A. Normanton</b> .....	723
Mould powder selection for thin slab casting <b>J.A. Kromhout, A.A. Kamperman, M. Kick, and J. Trouw</b> .....	731
Decomposition of $\text{Li}_2\text{CO}_3$ in existence of $\text{SiO}_2$ in mould flux of steel casting <b>J.-W. Kim, Y.-D. Lee, Y.-B. Kang, and H.-G. Lee</b> .....	737
Mould fluxes in continuous casting of steel-characterization and performance tuning <b>M. Görnerup, M. Hayashi, C.-Å. Dacker, and S. Seetharaman</b> .....	745

## SESSION 11C: INDUSTRIAL APPLICATIONS

Steel cleanliness and hydrogen in liquid steel <b>R. Dekkers, B. Blanpain, J. Plessers, and P. Wollants</b> .....	753
The role of metal and slag films stabilization phenomena with respect to clean steel <b>I. A. Minaev</b> .....	763
The control of inclusion composition to prevent rust formation on ferritic stainless steel <b>S. Kitamura</b> .....	769
Chemical and physical changes of cathode carbon by aluminium electrolysis <b>J. Hop, A. Støre, T. Foosnaes, and H.A. Øye</b> .....	775
Alternative electrolyte compositions for aluminium electrolysis <b>J. Thonstad and S. Rolseth</b> .....	783

## SESSION 12A: SENSORS AND MEASUREMENT

Keynote Address: Evaluation and control of iron and steelmaking slags through electrochemical FeO sensors <b>M. Iwase, A. Mclean, K. Katogi, Y. Kikuchi, and K. Wakimoto</b> .....	787
Structural analysis of molten $\text{Na}_2\text{O-NaF-SiO}_2$ system by Raman spectroscopy and molecular dynamics simulation <b>Y. Sasaki, H. Urata, and K. Ishii</b> .....	797
Effect of properties of mould powder entrapped in molten steel in a continuous casting process <b>K. Tsutsumi, K. Watanabe, M. Suzuki, M. Nakada, and T. Shiomi</b> .....	803

## SESSION 12B: MOULD FLUXES

Keynote Address: Behaviour of continuous casting fluxes during heating and cooling <b>E. Brandaleze, E. Benavidez, L. Castella and J. Madias</b> .....	807
A test to determine crystallinity of mould fluxes <b>Z. Li, R. Thackray, and K.C. Mills</b> .....	813
Mould flux crystallization: a kinetic study <b>R. Carli and C. Righi</b> .....	821

## SESSION 12C: MODELLING AND SIMULATION

Keynote Address: Structure model and properties of alkali borate melts <b>Z. Zhang and R.G. Reddy</b> .....	827
Calculation of phase diagrams for the $\text{CaO-CaF}_2$ and $\text{CaO-BaO}$ binary systems by using molecular dynamics <b>W.-G. Seo, D. Zhou, T. Hamano, and F. Tsukihashi</b> .....	835
Thermodynamic modelling of the $\text{Al}_2\text{O}_3\text{-CaO-CoO-CrO-Cr}_2\text{O}_3\text{-FeO-Fe}_2\text{O}_3\text{-MgO-MnO-NiO-SiO}_2\text{-S}$ system and applications in ferrous process metallurgy <b>S.A. Deckerov, I.-H. Jung, E. Jak, Y.-B. Kang, P. Hayes, and A.D. Pelton</b> .....	839
